circles, basic
trigonometry and
coordinate
geometry

5 - 7 q

How the new SAT is scored?

Adaptive Testing Demystified

01

Get a random bunch of question in **Module 1**

The first module will contain a mix of easy, medium and difficult questions to gauge your average level on test day

02

Module 2 adjusts with your performance in module 1

Based on your performance in module 1, the questions here will adjust difficulty accordingly

03

Your **score is normalised** against other candidates

College board will adjust your raw score with a normalised score that will benchmark you with other test takers

eg: if you get most tough questions right in module 1, then module 2 will be relatively tougher for you

Course Features

Ultimate (Both)
